Protecting the Future

American Plum (Prunus americana)

Native to Nebraska and well adapted to a wide variety of soil and climatic conditions. Forms dense thickets ideal for outside rows of windbreaks and wildlife habitat. Birds use thickets for nesting, feeding and resting areas. Twigs are preferred source of browse for deer/rabbits. White flowers bloom in May, red and purple plums ripen in September. Earliest ripening fruit is the sweetest and makes best jelly.

Height at maturity: 5-8'
Spacing within rows: 6-10'
Spacing between rows: 12-16'

Golden Currant (Ribes aureum)

Golden currant is a winter-hardy, drought-tolerant, small, native shrub. It has very fragrant yellow flowers during May. The edible fruit is yellowish to purplish black when ripe. The fruit can be eaten directly from the bush or made into jelly. Excellent wildlife habitat and/or can be used on the outside row of multi-row windbreaks.

Height at maturity: 4-6'
Spacing within rows: 6-10'
Spacing between rows: 12-16'

Wildlife Package for Small Acreages

*For landowners that want to
plant trees, but don't want
25 of one kind of tree*

Woods' Rose (Rosa woodsii)

A superb small native rose, Rosa woodsii has rose-pink flowers in early June. The bright red hips persist throughout winter, and are eaten by insects, birds, small mammals and large mammals. Requires very little fertilization, pest, disease control and pruning, Offers beautiful foliage, flowers and hips. Drought tolerant, needs little sun and can survive on steep, rocky slopes with little topsoil. Excellent choice for difficult sites.

Height at maturity: 1-3'
Spacing within rows: 3-5'
Spacing between rows: 3-8'

Nanking Cherry (Prunus tomentosa)

A winter hardy, moderately fast-growing, medium shrub. Broad spreading, densely twiggy, becoming more open and picturesque with age. Also called Manchu cherry. Edible fruits are dark red, excellent for pies and jellies. Fruit is relished by many songbirds. Provides nesting cover for a few species of songbirds. Browsed by rabbits, mice, and deer, which could cause serious injury if control measures are not taken. It is sometimes a rather short-lived plant.

Height at maturity: 4-7'
Spacing within rows: 6-10'
Spacing between rows: 12-16'

Black Chokeberry (Aronia melanocarpa)

Member of the Rose family, berries (also known as Aronia berries) can be canned whole or juice extracted for jelly making, as well as healthful fruit drinks. Plants are browsed by white-tailed deer and rabbits. Fruit are eaten by ruffed grouse, sharp-tailed grouse and prairie chickens. Best growth and fruit production occurs on low moist but well-drained sites, in full sun. Not drought-tolerant.

Height at maturity: 4-8'
Spacing within rows: 6-10'
Spacing between rows: 12-16'
