Follow us:

Ponderosa Pine

(*Pinus ponderosa*)

Ponderosa Pine is native to northwest and north central Nebraska. Needles are grouped in threes and sometimes pairs 5-10" long. Cones are 3-6" long, each scale is armed with a sharp recurved spine. Can withstand prolonged drought and is the best pine to use on severe sites. Best used in east and south inside rows of windbreaks.

Height at maturity: 35-55'

Spacing within rows: 16-20'

Spacing between rows: 12-24'

Small Acreage Package For Western Nebraska

For landowners that want to plant trees, but don't want 25 seedlings of one kind.

Rocky Mountain Juniper

(*Juniperus scopulorum*)

Rocky Mountain Juniper prefers slightly alkaline soils, but also grows well in rocky, sandy, or clay soils. Medium-sized tree, ranges from 15 - 25' in height. It is drought resistant.

Maintains a bluish-green color throughout the winter. Provides both food and protective cover for wildlife.

Height at maturity: 15-25'

Spacing within rows: 12-16'

Spacing between rows: 12-24'

Nanking Cherry

(*Prunus tomentosa*)

A winter hardy, moderately fast-growing, medium shrub. Broad spreading, densely twiggy, becoming more open and picturesque with age. Also called Manchu cherry. Edible fruits are dark red and excellent for pies and jellies.

Provides nesting cover and fruit for songbirds. Browsed by rabbits, mice, and deer, which could cause serious injury if control measures are not taken. It is sometimes a rather short-lived plant.

Height at maturity: 4-7'

Spacing within rows: 6-10'

Spacing between rows: 12-16'

Bur Oak (*Quercus macrocarpa*)

Native to Nebraska, the Bur Oak grows on a wide variety of sites. Grows best on rich, moist bottomlands.

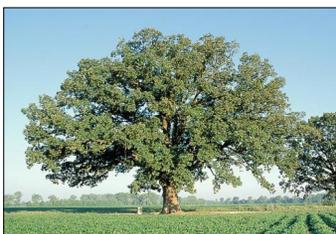

Bur oak has a slow to moderate growth rate

and is drought tolerant. An excellent species to include in wildlife habitat plantings. It is less susceptible to oak wilt than northern red oak and has no serious insect problems. Oaks may have to be protected from deer when young.

Height at maturity: 35-45'

Spacing within rows: 16-22'

Spacing between rows: 16-24'

American Plum

(*Prunus americana*)

Native to Nebraska and well adapted to a wide variety of soil & climatic conditions. Forms dense thickets ideal for outside rows of windbreaks and for wildlife habitat. Birds, deer, and rabbits use thickets during the winter. White flowers bloom in May, with red to purple plums ripening during September. Earliest ripening fruit is usually the sweetest and makes the best jelly.

Height at maturity: 5-8'

Spacing within rows: 6-10'

Spacing between rows: 12-16'
